

CPA.com has partnered with LukkaTax to provide firms a robust tax preparation tool for virtual currency.

Trusted by institutions, now the preferred solution of tax practitioners.

TRUSTED

- Built by the creators of the first crypto tax calculator
- Trusted by 200+ funds, fund administrators, fund auditors, exchanges, OTC/prop desks, custodians & more
- The industry standard since 2014

ACCURATE

- Uses the industry's only crypto Fair Market Value (FMV) pricing methodology: Lukka Prime
- Fully integrated Lukka Reference Data - crypto tickers, pairs, and metadata monitored and updated daily
- Supports all methods of determining cost basis for crypto assets, including crypto to crypto trades

COMPREHENSIVE

- Purpose-built, institutional grade digital asset transaction accounting, including margin, mining income, fiat to crypto, and crypto to crypto trade support
- The only SOC 1 Type 2 digital asset tax provider
- Efficient, pre-mapped file support for exchanges and wallets

How LukkaTax Works

MANAGE

Easily onboard your professionals and enable them to efficiently manage their clients

COLLECT

Guided transaction data collection experience, via native exchange files and manual entry

ENRICH

Standardize and normalize data formats, fields, and tickers for easy cost basis assignment

REVIEW

One view to review transactions, remove duplicates, adjust taxable events, and add cost basis

REPORT

Generate and download detailed tax lot and roll-forward reports by asset class in FIFO, LIFO, or HIFO

Drive New Revenue
