Technology Disruptors: How They Will Change Your Job

PURPOSE

According to P. Scott Ozanus, KPMG U.S. deputy chairman and COO, in KPMG’s 2017 U.S. CEO Outlook Survey, “Technology disruptors are the largest drivers of change in business now and for the foreseeable future. These technology disruptors – automation, greater use of advanced data and analytics, cloud-based tools, robotics and AI – are common across all major industries, raising similar opportunities and challenges to business and operating models of the future.”

Mike Sabbatis, COO of XCM™, discusses how technology disruptors will change your job – whether you are a partner, manager or individual contributor.

Surveys show top business leaders are consistently facing challenges in:

- A: Staffing and retention**
- B: Trying to get more done with less**
- C: Having visibility to projects and data**
- D: Finding time to be proactive or strategic**

Watch this webinar to learn how technology disruptors will impact the profession and how workflow technology has enormous potential to enhance your firm’s business processes to create transparency, productivity and efficiency.
